

ENGLISH

How to Specify Door Width Needed

Measure the widest vehicle that will be traveling through the door.

Example: If the vehicle is 10'- 2", you will need to add at least 3'- 0" for inside clearance. In this case, the door width needed will be 13'- 2"

Refer to chart "How to Specify Door Width, Center Column 'B'." In this case, the closest match is 13'- 5". This is your door size. Chart "A" on the left will give you the nominal door width of 15'- 6" and chart "C" on the right will give you the entry width (outside dimension) required for that size door.

How to Specify Door Height Needed

Measure the height of the highest vehicle that will be traveling through the door.

Example: If the highest vehicle is 8'- 0", you will need to add at least 6" for underside clearance. In this case, the door height needed will be 8'- 6".

Refer to chart "How to Specify Door Height, center column to find the closest match to your needed height. The closest match in this situation would be 8'-7 3/8". The chart on the left will give you the nominal door height of 8'- 6" and the chart on the right will give you the entry height dimension of 9'-1 7/8" (height clearance to fit door frame)

METRIC

How to Specify Door Width Needed

Measure the widest vehicle that will be traveling through the door.

Example: If the vehicle is 3099mm, you will need to add at least 914mm for inside clearance. In this case, the door width needed will be 4013mm.

Refer to chart "How to Specify Door Width, Center Column 'B'" and find the closest match. In this case, the closest match is 4086mm. This is your door size. Chart "A" on the left will give you the nominal door width of 4721mm and chart "C" on the right will give you the entry width (outside dimension) required for that size door.

How to Specify Door Height Needed

Measure the height of the highest vehicle that will be traveling through the door.

Example: If the highest vehicle is 2438mm, you will need to add at least 152mm for underside clearance. In this case, the door height needed will be 2590mm.

Refer to chart "How to Specify Door Height, center column to find the closest match to your needed height. The closest match in this situation would be 2624mm. The chart on the left will give you the nominal door height of 2590mm and the chart on the right will give you the entry height dimension of 2789mm. (height clearance to fit door frame)
